Human Rights: New Dimensions and Challenges

Human Rights-Unesco 1998 Human Rights: New Dimensions and Challenges has been prepared by UNESCO with the aim of creating an international teaching aid for institutions of higher education. The book presents the interrelation and interdependence between human rights, and peace, democracy, development and the environment. It analyses obstacles and threats to human rights at the dawn of the twenty-first century and suggests ways and means to overcome them.

Human Rights-Janusz Symonides 2019-04-02 First published in 1998, this first volume of The Manual on Human Rights Education for Universities has been prepared in the hope that it will serve as a teaching aid for institutions of higher education, as well as for UNESCO Chairs, and focuses on new dimensions and challenges. UNESCO’s long experience in this field goes back to 1951, when the first guide for teachers on the Universal Declaration of Human Rights was published. This formed part of UNESCO’s efforts to create a comprehensive system of human rights education, embracing formal and non-formal education. Issues explored include peace, the environment, education, discrimination and extreme poverty.

Human rights : new dimensions and challenges-Janusz Symonides 1998

New Dimensions in Privacy Law-Andrew T. Kenyon 2006-11-02 This broad-ranging examination of privacy law considers the challenges faced by the law in changing technological, commercial and social environments. It encompasses three overlapping areas of analysis: privacy protection under the general law; legislative measures for data protection in digital communications networks; and the influence of transnational agreements and other pressures towards harmonised privacy standards. Leading internationally recognised authors discuss developments across these three areas in the United Kingdom, Europe, the United States, Australia and New Zealand.

The International Dimension of Human Rights-Claudia Martin 2001-01-01 The International Dimension of Human Rights includes extracts of judgments, reports and opinions of international supervisory organs and domestic judicial tribunals, as well as the work of scholars in this subject. This casebook has been divided into seven chapters that deal with the following topics: basic notions of international law; the relationship between international law and domestic law; the right to an effective remedy; the right to liberty and
security of persons and the right not to be tortured; the right to a fair trial; economic, social and cultural rights; and other aspects of international protection of human rights, such as the rights of women, the rights of indigenous peoples and environmental rights. The casebook also includes the most relevant international treaties on human rights adopted by the Inter-American, universal and European systems.

Philosophical Dimensions of Human Rights-Claudio Corradetti 2011-10-29 This book presents a unique collection of the most relevant perspectives in contemporary human rights philosophy. Different intellectual traditions are brought together to explore some of the core postmodern issues challenging standard justifications. Widely accessible also to non experts, contributions aim at opening new perspectives on the state of the art of the philosophy of human rights. This makes this book particularly suitable to human rights experts as well as master and doctoral students. Further, while conceived in a uniform and homogeneous way, the book is internally organized around three central themes: an introduction to theories of rights and their relation to values; a set of contributions presenting some of the most influential contemporary strategies; and finally a number of articles evaluating those empirical challenges springing from the implementation of human rights. This specific set-up of the book provides readers with a stimulating presentation of a growing and interconnecting number of problems that post-natural law theories face today. While most of the contributions are new and specifically conceived for the present occasion, the volume includes also some recently published influential essays on rights, democracy and their political implementation.

International Human Rights-Michael Haas 2013-09-05 This book provides a comprehensive introduction to international human rights -- international human rights law, why international human rights have increasingly risen to world prominence, what is being done about violations of human rights, and what might be done to further promote the cause of international human rights so that everyone may one day have their rights respected regardless of who they are or where they live. It explains: how the concept of international human rights has developed over time the variety of types of human rights (civil-political rights, economic-social rights, as well as a delineation of war crimes) empirical findings from statistical research on human rights institutional efforts to promote human rights an extensive listing of international human rights agreements identification of recent prosecutions of war criminals in domestic and international tribunals ongoing efforts to promote human rights through international aid programs the newest dimensions in the field of human rights (gay rights, animal rights, environmental rights). Richly illustrated throughout with case studies, controversies, court cases, think points, historical examples, biographical statements, and suggestions for further reading, International Human Rights is...
the ideal introduction for all students of human rights. The book will also be useful for human rights activists to learn how and where to file human rights complaints in order to bring violators to justice. The new edition is fully updated and includes new material on: the Obama presidency the Arab Spring and its aftermath the workings of the International Criminal Court quantitative analyses of human rights war crimes.

Food and Human Rights in Development: Legal and institutional dimensions and selected topics-Wenche Barth Eide 2005 The right to adequate food is firmly established in international human rights law. It is among those most cited in solemn declarations and most violated in practice. In a landmark decision, the 1996 World Food Summit decided to break with the all too familiar right-to-food rhetoric and requested a clarification of "the content of the right to food and the fundamental right of everyone to be free from hunger" and the means for its implementation. Since then much efforts have gone into further conceptualisation of social and cultural rights in general and the right to adequate food in particular. UN agencies, scholars, interested governments and civil society have joined forces in attempting to provide a foundation for national and international follow-up of the recommendations of the World Food Summit, reinforced by the Millennium Development Goals. This first of two volumes provides evidence of some of this work and gives direction for future activities to promote and protect the right to adequate food for all. It has contributions from some 15 authors who have all been directly involved, from different angles, in the advancement of the right to food and related human rights over the past years. Besides introducing the concept of the right to food and elaborating on its theoretical basis and meaning in development, it provides several recent examples from work both at the national and international level to apply it in practical situations, and with a special view to how to go about identifying the corresponding obligations of states and complementary duties and responsibilities of non-state actors and international organisations. Finally, several chapters address the right to food under special circumstances and for special groups needing particular attention. The book is the first of its kind on the right to food as a human right. It is not a textbook but is intended to inform and stimulate further debate among scholars, policy-makers and practitioners and activists alike, on some of the major issues of concern in applying a right-based approach to alleviating food insecurity, hunger and malnutrition, and in promoting access to and consumption of nutritionally adequate, safe and culturally acceptable food on a sustainable basis for all. It is now evident that with the current pace of events the goal set by the WFS and the MDG of halving poverty and hunger by 2015 will not be achieved. There is a growing need to watch some of the possible effects of rapid economic globalisation and market liberalisation on food and nutrition security conditions, and to promote countervailing measures to offset their most negative consequences, particularly for vulnerable groups. The right to food is a first test case of the extent to which the application of economic, social and cultural rights can effectively exert such counterforce in an increasingly economics- and market-driven international climate, and enhance progress towards established goals.

Handbook of Research on New Dimensions of Gender Mainstreaming and Women Empowerment-Kuruvilla, Moly 2020-06-12 Globally, women are facing social, economic, and cultural barriers impeding their autonomy and agency. Accelerated women
Empowerment programs often fail to attain their targets as envisaged by the policymakers due to a variety of reasons, with the most prominent being the deep-rooted cultural norms ingrained within society. In the era of globalization, empowerment of women demands new approaches and strategies that encourage the mainstreaming of gender equality as a societal norm. The Handbook of Research on New Dimensions of Gender Mainstreaming and Women Empowerment is a critical scholarly publication that examines global gender issues and new strategies for the promotion of women empowerment and gender mainstreaming in various spheres of women’s lives, including education and ICT, economic participation, health and sexuality, mental health, aging, law and judiciary, leadership, and decision making. It provides a comprehensive coverage of all major gender issues with novel ideas on gender mainstreaming being contributed by men and women authors from multidisciplinary backgrounds. Gender perspective and intersectional approach in the discourses make this handbook a unique contribution to the scholarship of social sciences and humanities. The book provides new theoretical inputs and practical directions to academicians, sociologists, social workers, psychologists, managers, lawyers, policy makers, and government officials in their efforts at gender mainstreaming. With a wide range of conceptual richness, this handbook is an excellent reference guide to students and researchers in programs pertaining to gender/women’s studies, cultural studies, economics, sociology, social work, medicine, law, and management.

International Human Rights Law and Diplomacy-Kriangsak Kittichaisaree 2020-03-28
This incisive book provides an unparalleled insight into the ways in which international human rights law functions in a real world context across cultural, religious and geopolitical divides. Written by a professor, former ambassador and international judge, the book demonstrates how power, diplomacy, tactics and processes operate within the human rights system from the perspective of a non-Western insider with more than three decades’ experience in the field.

Development as a Human Right-Bård-Anders Andreassen 2010 The relationship between the processes of economic development and international human rights standards has been one of parallel and rarely intersecting tracks of international action. In the last decade of the 20’ century, development thinking shifted from a growth-oriented model to the concept of human development as a process of enhancing human capabilities, and, the intrinsic links between development and human rights began to be more readily acknowledged. Specifically, it has been proposed that if strategies of development and policies to implement human rights are united, they reinforce one another in processes of synergy and improvement of the human condition. Such is the premise of the Declaration on the Right to
Development, adopted by the UN General Assembly in 1986. This book explores the meaning and practical implications of the right to development and the related term of human rights-based approaches to development and questions what these conceptions may add to our understanding and thinking about human and global development. Opening with an essay by Nobel Laureate in Economic Science Amartya Sen on human rights and development, the book contains a score of chapters on the conceptual underpinnings of development as a human right, the national dimensions of this right, and the role of international institutions. The authors reflect the disciplines of philosophy, economics, international law, and international relations. This 2nd edition of the book, originally published in 2006, has a new Foreword by the UN Commissioner for Human Rights, Navanethem Pillay. Bsrnd A. Andreassen is Professor at the Norwegian Center for Human Rights and Director of Research (human rights and development) at the Law Faculty, University of Oslo. Stephen P. Marks is Francois-Xavier Bagnoud Professor of Health and Human Rights in the Department of Global Health and Population at the Harvard School of Public Health and a senior Fellow at the University Committee on Human Rights Studies at Harvard

Encyclopaedia of Dalits in India-

The Moral Dimensions of Human Rights-Carl Wellman 2011-02-03 In The Moral Dimensions of Human Rights, Carl Wellman takes a broad approach to human rights by discussing all three types - moral, international, and national - at length. At the same time, Wellman pays special attention to the moral reasons that are relevant to each kind of human rights.

Rule of Law for Nature-Christina Voigt 2013-11-21 Questions the doctrinal construction of environmental law and looks for innovative legal approaches to ecological sustainability.

Human Rights and Climate Change-Siobhan Mcinerney-Lankford 2011 This Study explores arguments about the impact of climate change on human rights, examining the international legal frameworks governing human rights and climate change and identifying the relevant synergies and tensions between them. It considers arguments about (i) the human rights impacts of climate change at a macro level and how these impacts are spread disparately across countries; (ii) how climate change impacts human rights enjoyment within states and the equity and discrimination dimensions of those disparate impacts; and (iii) the role of international legal frameworks and mechanisms, including human rights instruments, particularly in the context of supporting developing countries’ adaptation efforts. The Study surveys the interface of human rights and climate change from the perspective of public international law. It builds upon the work that has been carried out on this interface by reviewing the legal issues it raises and complementing existing analyses by providing a comprehensive legal overview of the area and a focus on obligations upon States and other actors connected with climate change. The objective has therefore been to contribute to the global debate on climate change and human rights by offering a review of
the legal dimensions of this interface as well as a survey of the sources of public international law potentially relevant to climate change and human rights in order to facilitate an understanding of what is meant, in legal terms, by “human rights impacts of climate change” and help identify ways in which international law can respond to this interaction.

Human Rights from Below-Jim Ife 2009-11-12 In Human Rights from Below, Jim Ife shows how human rights and community development are problematic terms but powerful ideals, and that each is essential for understanding and practising the other. Ife contests that practitioners - advocates, activists, workers and volunteers - can better empower and protect communities when human rights are treated as more than just a specialist branch of law or international relations, and that human rights can be better realised when community development principles are applied. The book offers a long overdue assessment of how human rights and community development are invariably interconnected. It highlights how critical it is to understand the two as a basis for thinking about and taking action to address the serious challenges facing the world in the twenty-first century. Written both for students and for community development and human rights workers, Human Rights from Below brings together the important fields of human rights and community development, to enrich our thinking of both.

Human Rights-Janusz Symonides 2000-01 The right to life

Legal Issues of European Integration-Edmond Volker 1977-01-01

Human Rights and Private Wrongs-Alison Brysk 2013-04-15 Human Rights and Private Wrongs breaks new ground by considering a series of fascinating issues that are normally ignored by human rights specialists because they are too "private" to consider as policy issues: children's labor migration; refugee policy towards unaccompanied minors; financial matters of investor and business responsibility; and complex questions involving access to the benefits of pharmaceutical research, transnational organ trafficking, and the control over genetic research.

ICRDB Cancergram- 1985

Interpreting Human Rights-Rhiannon Morgan 2009-05-07 In recent decades, human rights have come to occupy an apparently unshakable position as a key and pervasive feature of contemporary global public culture. At the same time, human rights have become...
a central focus of research in the social sciences, embracing distinctive analytical and empirical agendas for the study of rights. This volume gathers together original social-scientific research on human rights, and in doing so situates them in an open intellectual terrain, thereby responding to the complexity and scope of meanings, practices, and institutions associated with such rights. Chapters in the book examine diverse theoretical perspectives and examine such issues as the right to health, indigenous peoples’ rights, cultural politics, the role of the United Nations, women and violence, the role of corporations and labour law. Written by leading scholars in the field and from a range of disciplines across the social sciences, this volume combines new empirical research with both established and innovative social theory.

The Judicial Application of Human Rights Law-Nihal Jayawickrama 2002-12-12 10 The right to life

Anti-Terrorist Measures and Human Rights-Alice Yotopoulos-Marangopoulo 2004-01-01 The tragic events of 11 September 2001 have led to an intensification of measures against terrorism both at the level of states and international organisations. New laws and resolutions have been passed in order to strengthen national and international action against terrorism. Some of these measures violate human rights and have been introduced without respect for obligatory procedures under international human rights conventions for derogations in cases of emergency. This development has given rise to much concern worldwide. In order to analyse the many (human rights) questions posed by the intensified struggle against terrorism, a symposium was organised, on the initiative of the Marangopoulos Foundation for Human Rights (MFHR) of Athens, by the European Training and Research Centre for Human Rights and Democracy (ETC) in Graz and the Diplomatic Academy of Vienna together with the MFHR. This volume brings together most of the contributions to this high-level and in-depth discussion in edited, updated form. Among the issues analysed are the dangers entailed in the new doctrine of pre-emptive wars, the issue of the prevention of terrorism through measures addressing its causes and the strengthening of human security. The volume also contains an annex with major documents relating to the question of human rights and terrorism at universal and regional levels prepared by international organisations and NGO’s, which represents a useful handbook on the topic. Marangopoulos Foundation for Human Rights (MFHR). Established in 1978 in Athens, Greece. Its main purposes are the research, study, defense, protection and promotion of generally recognised human rights and fundamental freedoms. Within this framework, MFHR takes a special interest in the advancement of formal and informal education on human rights, the raising of public awareness and the adoption by States or international organisations of measures protecting human rights, peace and the development of democratic institutions. For more details, see: http://www.mfhr.gr

European Training and Research Centre for Human Rights and Democracy (ETC) has been established in the year 2000, in the city of Graz, the first Human Rights City in Europe. It is a non-governmental organisation which is linked to the University of Graz through a cooperation agreement. The ETC has a particular focus on South-Eastern Europe, where it helped creating a network of human rights centres. In its training and research activities it is supported by an international advisory board. A particular focus of its training and
research programmes is the relationship between human rights and human security, non-discrimination, migration, democracy and human rights at the local level. For more details, see: http://www.etc-graz.at.

**New Dimensions For Economic Growth**-Dr. (Mrs.) Shashi Kumar 2004

For Information Dissemination To Address The Issues Of Sustainability, Environment, Ecological Imbalances, Depleting Natural Resources And Widening Socio-Economic Development Process Makes It Imperative To Solicit Partnership From Grass-Roots To International Level. To Approach The Issues From Multiple Directions, Many Disciplines For The Management Of Education Research With Above Thinking To Inspire Others Towards A Common Goal That The Poor Must Be Protected To Meet The Basic Needs. To Orient The Current Climate With Commitment For The Value Of Life Of The Poor, An Attempt Has Been Made In This Book To Bring Right Institution In Place For Sharing Knowledge Resources, And Facilities To Cope Up With The Impact Of Globalization In Order To Transform Not Only Agriculture But The Entire National Economy For Development To A Willingness To Know And Speak The Truth About Each Other.

**Democracy and Human Rights in Multicultural Societies**-Matthias Koenig 2007

By unanimous adoption of the Universal Declaration of Cultural Diversity, the UNESCO Member States accepted a new ethical approach to respect diversity as a guiding principle for democratic societies. While support for the Declaration remains strong, there is a general awareness that the democratic management of multicultural societies needs rethinking and further development. This publication examines the political governance of cultural diversity, specifically how public policy-making has dealt with the claims for cultural recognition that have increasingly been expressed by ethno-national movements, language groups, religious minorities, indigenous peoples and migrant communities. Its principle aim is to understand, explain and assess public policy responses to ethnic, linguistic and religious diversity. Adopting interdisciplinary perspectives of comparative social sciences, the contributors address the conditions, forms, and consequences of democratic and human-rights-based governance of multi-ethnic, multi-lingual and multi-faith societies.--Publisher's description.

**The Future of Human Rights**-Upendra Baxi 2007-12-12

This book critically examines the contemporary discourses on the nature of 'human rights', their histories, the myths that are embedded in them, and contributes an alternative reading of those histories by placing the concerns and interests of the 'people in struggle and communities of resistance' at centre stage. The work analyses the significance of the United Nations (UN) and the Universal Declaration of Human Rights and goes on to study the more contemporary issues such as women's struggle to feminize the understanding and practice of human rights, the postmodernist critique of the universal idiom of human rights and, most pertinently for the current world scene, it analyses the impact of globalization on the human rights movement. The volume includes a discussion on the proposed UN norms regarding the human rights responsibilities of multinational corporations and other business entities.
Globalization and Human Rights - Alison Brysk 2002-10-15 In this landmark volume, Alison Brysk has assembled an impressive array of scholars to address new questions about globalization and human rights. Is globalization generating both problems and opportunities? Are new problems replacing or intensifying state repression? How effective are new forms of human rights accountability? These essays include theoretical analyses by Richard Falk, Jack Donnelly, and James Rosenau. Chapters on sex tourism, international markets, and communications technology bring new perspectives to emerging issues. The authors investigate places such as the Dominican Republic, Nigeria, and the Philippines. The contemporary world is defined by globalization. While global human rights standards and institutions have been established, assaults on human dignity continue. These essays identify the new challenges to be faced, and suggest new ways to remedy the costs of globalization.

The Legal Nature of International Human Rights - Michael K. Addo 2010-05-17 A distinct legal perspective of human rights has evolved alongside the traditional recognition as politics or philosophy. As an evolving social construct under the managerial direction of international human rights courts and treaty bodies, it provides a good framework in which to appreciate the substantive law.

Human Rights and Their Limits - Wiktor Osiatyński 2009-09-21 This book argues that human rights should be balanced with other values that are indispensable for social harmony and personal happiness.

The Universal Declaration of Human Rights in the 21st Century - Gordon Brown 2016-04-18 The Global Citizenship Commission was convened, under the leadership of former British Prime Minister Gordon Brown and the auspices of NYU’s Global Institute for Advanced Study, to re-examine the spirit and stirring words of The Universal Declaration of Human Rights. The result – this volume – offers a 21st-century commentary on the original document, furthering the work of human rights and illuminating the ideal of global citizenship. What does it mean for each of us to be members of a global community? Since 1948, the Declaration has stood as a beacon and a standard for a better world. Yet the work of making its ideals real is far from over. Hideous and systemic human rights abuses continue to be perpetrated at an alarming rate around the world. Too many people, particularly those in power, are hostile to human rights or indifferent to their claims. Meanwhile, our global interdependence deepens. Bringing together world leaders and thinkers in the fields of politics, ethics, and philosophy, the Commission set out to develop a common understanding of the meaning of global citizenship – one that arises from basic human rights and empowers every individual in the world. This landmark report affirms the Universal Declaration of Human Rights and seeks to renew the 1948 enterprise, and the very ideal of the human family, for our day and generation.

Human Rights and the Third World - Subrata Sankar Bagchi 2012-12-06 Human Rights and the Third World: Issues and Discourses deals with the controversial questions on the...
universalistic notions of human rights. It finds Third World perspectives and seeks to open up a discursive space in the human rights discourse to address unresolved questions, citing issues and problems from different countries in the Third World.

**Non-state Actors in the Human Rights Universe** - Zehra F. Kabasakal Arat 2006-01-01

"This book provides a new approach to the study of human rights and the issues of globalization and state sovereignty"--Provided by publisher.

**Critical Issues in Human Rights and Development** - Marks, Stephen P. 2021-11-09

This collection addresses human rights and development for researchers, policymakers and activists at a time of major challenges. "Critical issues" in the title signifies both the urgency of the issues and the need for critical rethinking. After exploring the overarching issues of development and economic theory, gender, climate change and disability, the book focuses on issues of technology and trade, education and information, water and sanitation, and work, health, housing and food.

**The Challenge of Human Rights** - David Keane 2012-01-01

‘This volume represents a genuine attempt to think beyond the realms of what exists, to reflect on ideas postulated in the past that could be of great salience in the future. It presents the reader with a key question; to what extent are the contemporary concepts of human rights and the systems that support them equipped to address the challenges of a changed world? By thinking through some of the ideas of the past, with a set of promising young scholars alongside more established names, readers will gain a sense of how human rights politics have shaped the current regime while also becoming attuned to the extent to which new directions and mechanisms can be forged in the future. Many of the individuals whose contributions are encompassed in this volume have strong links to the Irish Centre for Human Rights, at the National University of Ireland, Galway, an institution that has had a significant impact in its first decade of existence under the stewardship of Professor William A. Schabas. This volume celebrates the success of the institution by showcasing some of the talent it has generated, and is likely to be of avid interest to all who care about the future of human rights.’ – From the foreword by Joshua Castellino, Middlesex University, UK

The Challenge of Human Rights takes a detailed and exploratory approach to topics across the field of human rights, and seeks to map a path for future research and policy development. It examines contemporary approaches to established rights, such as the right to peace and the protection against double jeopardy, while also revisiting overlooked or forgotten rights and concepts such as slavery, apartheid and the right to resist, determining the optimal place for those rights in today’s world. The contributing authors outline lacunae in human rights law where rights could be established, from voting rights for under-18s to rights for the dead to cultural and intellectual property rights, and also apply completely new approaches to questions that have troubled human rights advocates for decades. This innovative book will be essential reading for researchers and practitioners of human rights law, political scientists, historians, and others who have a general interest in the future trajectory of human rights.
Media Revolution in Europe-Karol Jakubowicz 2011-01-01 The "rags to riches" story of Karol Jakubowicz's involvement in the work of the Council of Europe took him from the role of an awestruck newcomer from Poland in 1990 to that of the Chairman of the Steering Committee on the Media and New Communication Services (2005-06). Along the way, he was elected, delegated by the Steering Committee, and invited by the Council of Europe Secretariat to serve in a number of other capacities. In all of them, he contributed a wide variety of papers, reports and studies to assist the steering committee and other bodies in collecting information and formulating ideas in the general field of freedom of expression, creation of free and democratic media systems (including the issue of public service media), regulation of transfrontier television, the adjustment of Council of Europe human rights standards to the conditions of the information society, and the development of broadcasting legislation in Council of Europe member states. The present collection of these papers and reports is published in the conviction that they retain their value and relevance. It provides the additional benefit of offering a glimpse of the work preceding the formulation of Committee of Ministers recommendations and declarations, as well as resolutions of the Council of Europe Parliamentary Assembly.

Human Development Report 1994-United Nations Development Programme 1994 Expounds a new concept of human security- one that focuses on the security of people in their homes, in their jobs, in their communities and in their environment.
