Markets In Oaxaca

Markets in Oaxaca-Scott Cook 2014-11-11 Markets in Oaxaca is a study of the regional peasant marketing system in the Valley of Oaxaca, Mexico. It relates the marketing system to other aspects of the regional economy, to neighboring regions, and to the Mexican national economy. Combining ethnographic, theoretical, and regional analyses, it suggests new directions in the fields of peasant and development studies. Contributors to the volume describe the operation and nature of several marketplaces in the region, analyze village-based artisan production and various specialized economic roles (particularly the role of traders), and describe the operation of several total regional marketing systems. The editors then consider their findings against the background of political, economic, and social structures from the pre-Conquest period to the present. In their conclusion, the editors find the regional peasant economy to be responsive both to the influence of the urban metropolitan sector, on the one hand, and to its own indigenous structural integrity and internal dynamism, on the other. In addition to the editors, the contributors to Markets in Oaxaca are Ralph L. Beals, Richard L. Berg Jr., Beverly Chiñas, Herbert M. Eder, Charlotte Stolmaker, Carole Turkenik, John C. Warner, Ronald Waterbury, and Cecil R. Welte. Their essays combine analyses of the elements of the system within a comprehensive theoretical framework. Together, they present a complete and integrated view of a peasant economy.

Crafts in the World Market-June C. Nash The growing exchange of traditional craft objects in world markets has had a profound impact on the lives of the women and men who produce them. These essays describe how the flow of goods from the industrial centers of the world to the colonies in earlier centuries is now met by a reverse flow as consumers seek the exotic and unique objects of handicraft production in Third World countries. The book explores the paradox of how artisans continue to create traditional objects, yet new sources of wealth and intensified production are transforming their traditional lifeways in areas such as the Oaxaca Valley, the Yucatan, Highland Chiapas, and Guatemala.

Corn Meets Maize-Lauren Baker 2013 Corn Meets Maize links the everyday practices of growing, cooking, and exchanging food in specific cultural, economic, and ecological contexts to broader social movements in Mexico and beyond. The local food networks Lauren E. Baker explores in Mexico are rich examples of contemporary agricultural and culinary transformations; they also reveal the
impacts of neoliberal economic policies and new agricultural biotechnologies. Drawing on concrete examples of projects and people working to transform global food systems, she provides important insight into the complexities of food politics from field to fork.

Federico Jiménez Caballero 2021 "This edited autobiography is a frank and intimate account of over seventy-six years in the life of Federico Jiménez Caballero, a man with deep indigenous roots in which the supernatural is blended with the practical in everyday life. Jiménez Caballero's story is told in the first person based on his memories and real-life experiences as a man of mixed heritage who identifies with both his Mixtec indigenous culture as well as his Mestizo side of the family. As a child growing up in a rural, peasant village in Mexico, Jiménez Caballero faced challenges that most of us cannot even imagine yet alone overcome; as a young adult he never stood still but instead depended on his survival skills and sheer will to become the successful person he was predicted to be at his birth. In the United States, Jiménez Caballero has created an identity that bridges his Mexican indigenous heritage with the overall Latino culture of southern California. Through all of his trials and tribulations he created a successful life for a young indigenous boy who had grown up in a culturally mixed, Mestizo-indigenous, peasant village where the cows and horses had to be chased off a grass landing strip. From these humble beginnings he moved up to the bright lights and fame as a jewelry artist to the stars in Hollywood. Jiménez Caballero's success as an entrepreneur and artist opened doors where he connected with the wealthy elite and became a celebrated philanthropist. The manuscript includes a brief personal introduction by Shelby Tisdale, editor of the manuscript, that focuses on her relationship with Jiménez Caballero, providing a glimpse into his Mixtec past and how it relates to his family heritage"--

Between Field and Cooking Pot
Florence E. Babb 1998 From reviews of the first edition: "The book has a clear and readable style, moving easily between vignettes of marketwomen's lives, descriptions of the markets themselves, and surveys of the theoretical literature. Babb's close involvement with the Huaraz markets is apparent. As someone who has spent a lot of time in Andean markets, I found the book pleasurable to read, because it recreated the experience of the marketplace so well." —American Ethnologist "Between Field and Cooking Pot offers details of the daily lives of marketwomen in the central Andean departmental capital of Huaraz. . . . A welcome addition to studies of women and international development, this book contains a wealth of firsthand material, collected through informal participant-observation as well as formal interviews and analysis of statistical data. . . . The book encourages us to imagine how the dynamic culture of marketwomen might intersect with the construction, representation, and effects of class and gender." —American Anthropologist "The book has a clear and readable style, moving easily between vignettes of marketwomen's lives, descriptions of the markets themselves, and surveys of the theoretical literature. Babb's long, close involvement with the Huaraz markets is apparent. As someone who has spent a lot of time in Andean markets, I found the book pleasurable to read, because it recreated the experience of the marketplace so well." —American Ethnologist This revised edition of Between Field and Cooking Pot offers an updated appraisal of what neoliberal politics and economics mean in the lives of marketwomen in the nineties, based on new fieldwork conducted in 1997. Babb also reflects on how recent currents in feminist and anthropological studies have caused her to rethink some aspects of Andean marketers in Peruvian culture and society.

Handbook of Middle American Indians, Volumes 7 and 8
Evon Z. Vogt 2015-01-16 Ethnology comprises the seventh and eighth volumes in the Handbook of Middle American Indians, published in cooperation with the Middle American Research Institute of Tulane University under the general editorship of Robert Wauchoppe (1909–1979). The editor of the Ethnology volumes is Evon Z. Vogt (1918–2004), Professor of Anthropology in the Department of Social Relations, Harvard University. These two books contain forty-three articles, all written by authorities in their field, on the ethnology of the Maya region, the southern Mexican highlands and adjacent regions, the central Mexican highlands, western Mexico, and northwest Mexico. Among the topics described for each group of Indians are the history of ethnological investigations, cultural and linguistic distributions, major postcontact events, population, subsistence systems and food patterns, settlement patterns, technology, economy, social organization, religion and world view, aesthetic and recreational patterns, life cycle and personality development, and annual cycle of life. The volumes are illustrated with photographs and drawings of contemporary and early historical scenes of native Indian life in Mexico and Central America. The Handbook of Middle American Indians was assembled and edited at the Middle American Research Institute of Tulane University with the assistance of grants from the National Science Foundation and under the sponsorship of the National Research Council Committee on Latin American Anthropology.

Impact of a modern economy on a traditional system of markets
Ralph Leon Beals 1965
Mercados—David Sterling 2019-04-30 Part travelogue, part cookbook, Mercados takes us on a tour of Mexico’s most colorful destinations—its markets—led by an award-winning, preeminent guide whose passion for Mexican food attracted followers from around the globe. Just as David Sterling’s Yucatán earned him praise for his “meticulously researched knowledge” (Saveur) and for producing “a labor of love that well documents place, people and, yes, food” (Booklist), Mercados now invites readers to learn about local ingredients, meet vendors and cooks, and taste dishes that reflect Mexico’s distinctive regional cuisine. Serving up more than one hundred recipes, Mercados presents unique versions of Oaxaca’s legendary moles and Michoacan’s carnitas, as well as little-known specialties such as the charcuterie of Chiapas, the wild anise of Pátzcuaro, and the seafood soups of Veracruz. Sumptuous color photographs transport us to the enormous forty-acre, 10,000-merchant Central de Abastos in Oaxaca as well as tiny tianguises in Tabasco. Blending immersive research and passionate appreciation, David Sterling’s final opus is at once a must-have cookbook and a literary feast for the gastronome.

Regional Dynamics Burgundian Landscapes in Historical Perspective—Carole Crumley 2013-10-24 Regional Dynamics: Burgundian Landscapes in Historical Perspective challenges traditional practices and approaches to regional studies by anthropologists and economic geographers. This book attempts to incorporate various fields such as natural sciences, social sciences, and humanities for a more comprehensive framework in regional studies. A region that has historical record of depth, i.e., Burgundy, France, is chosen for this book. The book begins with a chapter on theories that critique the past approaches to regional studies and introduces relevant concepts covered in the book such as landscape, sociohistorical structures, heterarchy, etc. The following chapters focus on the physical structures of the region, the archaeological excavations, settlement and land use during the Iron Age and Gallo-Roman times, multiscalar research design, and Roman period beginning from its conquest until the Middle Ages. A summary of important themes is given in the last chapter. This book caters to many students and professionals in various fields like anthropology, geography, archeology, history, economics, and ecology.

Informal Markets in Developing Economies—Shrijay Devaraj Urs 1989

Deco Body, Deco City—Ageeth Sluis 2015-11-01 In the turbulent decades following the Mexican Revolution, Mexico City saw a drastic influx of female migrants seeking escape and protection from the ravages of war in the countryside. While some settled in slums and tenements, where the informal economy often provided the only means of survival, the revolution, in the absence of men, also prompted women to take up traditionally male roles, created new jobs in the public sphere open to women, and carved out new social spaces in which women could exercise agency. In Deco Body, Deco City, Ageeth Sluis explores the effects of changing gender norms on the formation of urban space in Mexico City by linking aesthetic and architectural discourses to political and social developments. Through an analysis of the relationship between female migration to the city and gender performances on and off the stage, the book shows how a new transnational ideal female physique informed the physical shape of the city. By bridging the gap between indigenismo (pride in Mexico’s indigenous heritage) and mestizaje (privileging the ideal of race mixing), this new female deco body paved the way for mestizo modernity. This cultural history enriches our understanding of Mexico’s postrevolutionary decades and brings together social, gender, theater, and architectural history to demonstrate how changing gender norms formed the basis of a new urban modernity.

Urban Labor Markets in Sub-Saharan Africa—Philippe De Vreyer 2013-06-07 Although labor is usually the unique asset upon which poor people can make a living, little is known about the functioning of labor markets in Sub-Saharan Africa. The purpose of this volume is to contribute to the building of knowledge in this area. In this book, the authors use a unique set of identical and simultaneous labor force surveys conducted in seven capitals of Western Africa, as well as in some other African countries (Cameroon, Madagascar, Democratic Republic of Congo) in the 2000s. They present innovative and original results on how people are faring in these labour markets, using up-to-date econometric and statistical methods. Because so little is known about labor markets in the region, each chapter starts with detailed descriptive statistics that aim to shed light onto specific aspects of African urban labor markets. Comparisons between the ten cities are systematically carried out. Descriptive sections are followed by in-depth analyses on various issues. The book is divided into four parts that examine 13 topics. Part I presents the main stylised facts, which are investigated further in a more analytical way throughout the volume. Part II focuses on job quality and labor market conditions, such as unemployment and underemployment, vulnerability, and job satisfaction. Part III explores the many dimensions of labor market inequalities through various lenses, such as returns on education, segmentation, life-cycle inequality (with a particular focus on old age), inter-generational mobility, time related inequality, and gender and ethnic earnings discrimination. Part IV addresses some key coping mechanisms and private responses, with a focus on migration and child labor. The book concludes with recommendations for future research.

Crossing Borders-Kimberly M. Grimes 1998-07-01 “Defining borders is a complex task, especially today as globalization accelerates at an unprecedented rate. We have entered a transnational age, one in which borders are more porous.” So says Kimberly M. Grimes in Crossing Borders: Changing Social Identities in Southern Mexico, her investigation of migration to the United States from Putla de Guerrero, Oaxaca. Featuring testimonies of residents and migrants, Grimes allows local voices to describe the ways in which Putlecans find themselves negotiating among competing social values. The testimonies of the Putlecans indicate that the changes occurring in their small town as a result of the circular migration to and from such immigrant enclaves as Atlantic City, New Jersey, are viewed with mixed emotions. Putlecans recognize the financial need to migrate north but they rue the increased consumerism, pollution, and trash that comes with the rising wealth. Men show off by driving their fancy cars with New Jersey tags around the tiny Mexican town, but influenced by Anglo culture, they also provide greater assistance in child care and housework. Women find the sexual and social freedoms of the United States liberating, but they still return home to baptize their babies. Grimes reminds us, however, that the Putlecans are not passive recipients of change but are actively embracing it, creating it, and mediating it. By reaching across the border to investigate migration, Grimes shows us that social and cultural change are not just the result of national and transnational influences, but are also locally negotiated phenomena.

Economic Development-Jeffrey H. Cohen 2002-04-23 Economic development is an important focus of anthropological work in rural and urban communities around the world, and in this volume the contributors offer expert analyses on the theory and practice of development. Chapters cover the key topics of market systems, agricultural knowledge, modernization, population growth, participatory development, conservation strategies, culturally sustainable development, globalization and privatization, tourism, urban development, and financial markets. The cross-cultural focus of the volume provides original data on development processes in many countries, including the Philippines, Bali, Costa Rica, Mexico, Honduras, Venezuela, Kazakhstan, and the United States. The book will be a welcome source of comparative research for anthropologists, development specialists, agricultural researchers, environmentalists, and geographers.

European Youth Labour Markets-Miguel Ángel Malo 2017-11-10 This timely analysis examines the complex state of youth unemployment across Europe and offers cogent policy suggestions for addressing this longstanding societal problem. The findings reveal numerous national and regional factors affecting youth joblessness—not only market and economic challenges, but also deep sociocultural and political dynamics underlying the situations. Coverage details how the standard transition from school to work is disrupted in an already depressed adult job market, and compares a wide range of responses in terms of both young people’s educational decision-making and national youth policy. In particular, contributors assess whether the current crop of Youth Guarantee programs can/should be a model for employment policy across the continent. Among the topics covered: Youth labour market prospects and recent policy developments. Youth labour market in Central and Eastern Europe: Early school dropout in Spain: evolution during the Great Recession. Overeducation among European university graduates: a constraint or a choice? Promoting youth employment in Europe: evidence-based policy lessons. The evaluation of a Finnish youth guarantee: lessons for Europe? European Youth Labour Markets is of interest to an international audience of economists, sociologists, and leaders in governmental, non-profit, and corporate sectors through its broad and comparative macroeconomic focus and implications for policymaking, research, resource allocation, and policy evaluation.

Labor Economics: Problems in Analyzing Labor Markets-William A. Darity, Jr. 2012-12-06 William Darity, Jr. In 1984 the Kluwer series in Modern Economic Thought, under the editorial direction of Warren Samuels, brought out a book under my editorship entitled Labor Economics: Modern Views. It consisted of a series of essays and commentaries that sought, in a critical fashion, to assess the state of the art in the field of labor economics with respect to several themes. These included methodology versus practice, the analysis of discrimination by gender and race, the phenomenon of persistent racial differences in unemployment exposure, occupational safety and health regulation, dual versus segmented labor markets, and the remnants of the Phillips curve trade-off between unemployment and inflation. Nearly a decade later I was approached by Warren Samuels and Kluwer about editing a new book that would again address where things stand in labor economics. In proceeding with the development of this current book I was a struck by the extent to which the research thrust that was apparent in the early 1980s remains intact as we move toward the 21st century. The vast majority of scholarship in the labor subfield is dominated by the methodological orientation of applied neoclassical microeconomics, supplemented by incursions from the so-called "pure theorists," particularly of the game theoretic variety.

The Peasant Marketing System of Oaxaca, Mexico-Ralph L. Beals 1975-01-01

Labour Markets and Economic Development-Ravi Kanbur 2009 As developing and transition economies enter the next phase of reforms, labor market issues increasingly come to the fore. With the increased competition from globalization, the discussion is shifting to the need for greater labor market flexibility and the creation of “good” jobs. Moreover, the greater actual and perceived insecurity in labor markets has generated a new agenda on how to structure safety nets and labor market regulation. The older questions of the links between the formal and informal labor market, reappear with new dimensions and significance. More generally, it is clear that an accurate understanding of how labor market structures function is essential if we are to analyze alternative policy proposals in the wake of these concerns. Oddly enough, in spite of this great importance, there are no recent monographs that bring together rigorous studies produced by academic researchers on these various issues. This book fills that gap. Under the steady editorship of Ravi Kanbur and Jan Svejnar, the contributors flourish in their attempts to enliven these debates.

The Economics of Imperfect Labor Markets, Third Edition - Tito Boeri 2021-01-26

The leading textbook on imperfect labor markets and the institutions that affect them—now completely updated and expanded. Today's labor markets are witnessing seismic changes brought on by such factors as rising self-employment, temporary employment, zero-hour contracts, and the growth of the sharing economy. This fully updated and revised third edition of The Economics of Imperfect Labor Markets reflects these and other critical changes in imperfect labor markets, and it has been significantly expanded to discuss topics such as workplace safety, regulations on self-employment, and disability and absence from work. This new edition also features engaging case studies that illustrate key aspects of imperfect labor markets. Authoritative and accessible, this textbook examines the many institutions that affect the behavior of workers and employers in imperfect labor markets. These include minimum wages, employment protection legislation, unemployment benefits, family policies, equal opportunity legislation, collective bargaining, early retirement programs, and education and migration policies. Written for advanced undergraduates and beginning graduate students, the book carefully defines and measures these institutions to accurately characterize their effects, and discusses how these institutions are being transformed today. Fully updated to reflect today's changing labor markets. Significantly expanded to discuss a wealth of new topics, including the impact of the COVID-19 pandemic. Features quantitative examples, new case studies, data sets that enable users to replicate results in the literature, technical appendixes, and end-of-chapter exercises. Unique focus on institutions in imperfect labor markets. Self-contained chapters cover each of the most important labor-market institutions. Instructor's manual available to professors—now with new exercises and solutions.

Understanding Commodity Cultures - Scott Cook 2004

This book explores how lived experience is informed by and shapes the diversifying funds of knowledge that enable people under economic stress to make culturally-informed choices in their material interest. By selectively reviewing the economic anthropological record and critically examining specific studies in several of Mexico's (and Guatemala's) key regions, as well as the U.S.-Mexico borderlands and the new trans-border space in the U.S. and Canada for Mexican migrant labor, the author encourages readers to critically rethink their views of economic otherness in Mexico (and, by extension, elsewhere in Latin America and the Third World), and presents a new framework for reconciling the continuing attraction of concepts like 'penny capitalism' with the realities of a world ever more subjected to continental and global market projects of 'Dollar Capitalism'. Globalization, Labour Markets and Inequality in India - Dipak Mazumdar 2020-11-25

India started on a program of reforms, both in its external and internal aspects, sometime in the mid-eighties and going on into the nineties. While the increased exposure to world markets (‘globalization’) and relaxation of domestic controls has undoubtedly given a spurt to the GDP growth rate, its impact on poverty, inequality and employment have been controversial. This book examines in detail these aspects of post-reform India and discurs the changes and trends which these new developments have created. Providing an original analysis of unit-level data available from the quinquennial National Sample Surveys, the Annual Surveys of Industries and other basic data sources, the authors analyse and compare the results with other pieces of work in the literature. As well as describing the overall situation for India, the book highlights regional differences, and looks at the major industrial sectors such as agriculture, manufacturing and tertiary services. The important topic of labor market institutions - both for the formal or organized and the unorganized sectors - is considered and the possible adverse effect on employment growth of the regulatory labor framework is examined carefully. Since any reform of this framework must go hand in hand with better state intervention in the informal sector to have any chance of acceptance politically, some of the major initiatives in this area are critically explored. Overall, this book will be of great interest to development economists, labour economists and specialists in South Asian Studies.
