Rhinoplasty and Facial Plastic Surgery - Jacques Joseph 1987

Face - Ewa Bogdanowska-Jakubowska 2010

Jacques Joseph, Surgical Sculptor - Paul Natvig 1982

Twelve Years A Slave (Illustrated) - Solomon Northup 2014-08-22 Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana.

A Rhinoplasty Tetralogy - David Ralph Millard 1996 will learn from the acknowledged master of the field in this definitive volume. In hundreds of personal case sketches, each liberally supported with beautiful color photographs, Dr. Millard shares the wealth of knowledge garnered in an illustrious half-century career in rhinoplasty. All aspects of the procedure, from fundamental principles to special considerations to long-term follow-up, are covered in the work's four sections: Corrective, Secondary, Congenital, and Reconstructive Rhinoplasty. Over 1,500 color photos represent the challenges and triumphs of over 50 years of cases, supplemented by some 2,300 figures that offer a close-up view of various procedural techniques and their results
**Cosmetic Scalpel**-Lorenz James Ludovici 1981

**Master Techniques in Rhinoplasty**-Babak Azizzadeh 2011 Master Techniques in Rhinoplasty is a concise yet comprehensive, multi-authored, multi-specialty surgical text and video atlas that provides all the guidance you need to get the best outcomes in rhinoplasty. Babak Azizzadeh, MD, FACS and other leading experts guide you through both open and endonasal primary and secondary rhinoplasty techniques with the use of step-by-step procedures, color line drawings, intraoperative photographs, and narrated videos on DVD. Expertly perform the latest open and endonasal techniques for both primary and revision rhinoplasty and give your patients the outstanding results they demand. Choose the most promising approach based on multiple expert viewpoints on the advantages and disadvantages of each approach. Review history, personal philosophy, anatomy, preoperative analysis, technique, and postoperative care, and complication avoidance for each procedure - all the information you need to get the best outcomes. Master the nuances of each new technique through step-by-step instructions and beautiful, detailed line drawings and intraoperative photographs. Watch master surgeons perform techniques in narrated videos on the included DVD. Tap into the experience and expertise of leading reconstructive and cosmetic plastic surgeons.

**Aesthetic Rhinoplasty**-Gilbert Aiach 1991 A practical exploration of rhinoplasty and the techniques used by surgeons in this field, this text has a number of case studies covering primary and secondary rhinoplasty. Each study includes an analysis of the problem, the treatment plan, operative details and photographs.

**Craniofacial Distraction**-Joseph G. McCarthy 2017-06-08 This book, edited by a leading pioneer of craniofacial distraction, summarizes the progress achieved in the field in a way that will serve the needs of the practicing clinician. All components of the craniofacial anatomy are covered and all topics are discussed in depth: clinical and anatomic pathology, diagnostic studies, treatment protocols, preoperative planning (including the latest virtual programs), device selection, operating room technical considerations, postoperative management, and intermediate/long-term follow-up. Relevant and timely studies from the literature are cited. The book is excellently illustrated, with many patient photos, radiographs, and drawings. Craniofacial Distraction will be a superb, up-to-date resource for a wide range of practitioners, including maxillofacial surgeons, craniofacial surgeons, plastic surgeons, head and neck surgeons, pediatric surgeons, orthodontists, prosthodontists, and pedodontists.
Rhinoplasty: Current Therapy, An Issue of Oral and Maxillofacial Surgery Clinics - E-Book-Shahrokh C. Bagheri 2012-02-28 A comprehensive update of rhinoplasty for the oral and maxillofacial surgeon! Topics include basics of primary cosmetic rhinoplasty, facial analysis, anatomy of the nose for rhinoplasty, septoplasty in conjunction with cosmetic rhinoplasty, grafting techniques and materials for rhinoplasty, nasal tip modifications, correction of the crooked nose, endonasal rhinoplasty, revision rhinoplasty and challenging cases, ethnic rhinoplasty, history of rhinoplasty, and more!

Diseases of the Nose and Throat-Herbert Tilley 1921

ABC-Bonnie Zavell 1992 ABC's, First Words, Numbers and Shapes, Colors and Opposites including a special note to parents. Children will enjoy hours of learning fun in each 32-page bi-lingual book. All four books are designed specifically to teach and reinforce basic concepts for preschool through early elementary school children.

Pediatric Maxillofacial Trauma-George M. Kushner 2020-11-13 This book aims to assist the reader in navigating the potentially complex decision-making process involved in selecting the most appropriate intervention for each particular scenario that may be encountered by the practitioner or surgeon in the growing patient with facial trauma. Among the topics covered are the initial management of both soft and bony trauma, including different types of fracture, as well as the management of complications and revision surgery. The discerning practitioner will learn how to provide the appropriate intervention at the appropriate time, by taking into account skeletal growth when matching techniques to the injuries more common in the skeletally immature patient. It is also emphasized that in some cases, no intervention is advisable owing to the possibility of damaging growth centers or introducing additional scar tissue that may impede future growth. Pediatric Maxillofacial Trauma will provide key knowledge for surgeons treating growing patients, ensuring that their decisions to operate or delay intervention are evidence based.

History of Woman Suffrage: 1900-1920-Elizabeth Cady Stanton 1922

The Legends of Implant Dentistry - with The History of Transplantology and Implantology-Leonard I Linkow 2010-08-30
Aesthetic Rhinoplasty-Jack Sheen 1998 Aesthetic Rhinoplasty has earned a special place among the important texts in plastic surgery. In response to innumerable requests, a limited edition of this exceptional two-volume set has been published at a special value. If you have never owned a set (or your copies have mysteriously disappeared), now is your opportunity to benefit from this definitive information. Surgeons the world over have combed through the pages of this magnificent work to hone their skills and refine their knowledge in the subtle and challenging art of rhinoplasty. Dr. Jack Sheen, the acknowledged master of rhinoplasty, presents his innovations and teachings that have profoundly influenced the state of the art in rhinoplasty. This comprehensive reference guide explains his techniques for mastering augmentation/reduction, balance, tip grafting, spreader grafts, two-surface analysis of alar resection, clinical analysis of three-segment alar cartilage anatomy, malposition, and much more. Aesthetic rhinoplasty is never an easy procedure. But this set will make superior results easier to attain with its generous illustrations and hundreds of tips and tricks. Easy to read and easy to reference, this work is a must for any aesthetic surgeon.

Plastic Surgery of the Face Based on Selected Cases of War Injuries of the Face Including Burns, with Original Illustrations-H D 1882-1960 Gillies 2018-10-13 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Brain Development and Sexual Orientation-Jacques Balthazart 2012-08 Sexual orientation (homo- vs. heterosexuality) is one of many sex differences observed in humans. Sex differences can result from differential postnatal experiences (interaction with parents, environment) or from biological factors (hormones and genes) acting pre- or postnatally. The first option is often favored to explain sexual orientation although it is supported by little experimental evidence. In contrast, many sexually differentiated behaviors are organized during early life by an irreversible action of sex steroids. In particular, the preference for a male or female sex partner is largely determined in rodents by embryonic exposure to sex steroids. The early action of these steroids also seems to affect sexual orientation in humans. Indeed, clinical conditions associated with major endocrine changes during embryonic life often result in an increased incidence of homosexuality. Furthermore, multiple sexually differentiated behavioral, physiological, or even morphological traits that are known to be organized by prenatal steroids, at least in animals, are significantly different in homo- and heterosexual
populations. Thus prenatal endocrine (or genetic) factors seem to influence significantly human sexual orientation even if a large fraction of the variance remains unexplained to date. The possible interaction between biological factors acting prenatally and postnatal social influences remains to be investigated.

**The Gender Politics Of Educational Change**-Amanda Datnow 2002-11-01 What is the relationship of gender to the micropolitics of school reform? This book explores this timely research question, revealing the everyday struggles that happen between different factions of teachers with different definitions of what school means for students. The focus of this struggle, however, may not be on education, but rather on such underlying issues as gender. Using case studies, the author shows how gender politics can be used by teachers to delay reform.

**Cellular Physiology and Neurophysiology E-Book**-Mordecai P. Blaustein 2011-12-14 Gain a quick and easy understanding of this complex subject with the 2nd edition of Cellular Physiology and Neurophysiology by doctors Mordecai P. Blaustein, Joseph PY Kao, and Donald R. Matteson. The expanded and thoroughly updated content in this Mosby Physiology Monograph Series title bridges the gap between basic biochemistry, molecular and cell biology, neuroscience, and organ and systems physiology, providing the rich, clinically oriented coverage you need to master the latest concepts in neuroscience. See how cells function in health and disease with extensive discussion of cell membranes, action potentials, membrane proteins/transporters, osmosis, and more. Intuitive and user-friendly, this title is a highly effective way to learn cellular physiology and neurophysiology. Focus on the clinical implications of the material with frequent examples from systems physiology, pharmacology, and pathophysiology. Gain a solid grasp of transport processes—which are integral to all physiological processes, yet are neglected in many other cell biology texts. Understand therapeutic interventions and get an updated grasp of the field with information on recently discovered molecular mechanisms. Conveniently explore mathematical derivations with special boxes throughout the text. Test your knowledge of the material with an appendix of multiple-choice review questions, complete with correct answers Understand the latest concepts in neurophysiology with a completely new section on Synaptic Physiology. Learn all of the newest cellular physiology knowledge with sweeping updates throughout. Reference key abbreviations, symbols, and numerical constants at a glance with new appendices.

**Microtia and Atresia - Combined Approach by Plastic and Otologic Surgery**-K. Kaga 2013-10-14 Remarkable progress in the development of new concepts and techniques used in reconstructive surgery of microtia/atresia of the external auditory canal (EAC) has been made since the beginning of the 21st century. Helical computed tomography has made a three-dimensional reconstruction of the
soft tissue of the temporal bone surface and the cranium possible, and has laid the groundwork for a collaboration between plastic surgeons and otologists. This book presents the latest findings on reconstructive surgery performed jointly by plastic surgeons and otologists. Based on this concept, information on diagnosis, surgical procedures, outcomes, long-term results and psychology is discussed. Collaborative surgery offers advantages not only in terms of a better reconstruction of morphology and function, but also in terms of the lower number of surgical procedures required which reduces the psychological pressure and economic burden on patients.

Creating Beauty to Cure the Soul - Sander L. Gilman 1998 Explores the historical relationship of physical beauty to happiness, looking at the connection through a study of the practice and popularity of aesthetic surgery.

Love & Money - Ann-Margaret Carrozza 2017-05-16 "I have often said that money problems are not solved with money. Ann-Margaret understands it is not what you make but what you keep that matters. You will read this once and refer to it for years to come." —Dr. Phil, from his foreword It is no secret that we are living in an increasingly litigious society. What may come as a surprise, though, is that we are far more likely to be involved in a costly legal dispute with a former loved one than we are with a stranger. In Love and Money, Ann-Margaret Carrozza will help you to easily understand and implement essential legal strategies to prevent you from doing legal battle with someone you once shared Thanksgiving dinner (or a pillow) with. Through an engaging narrative, including amusing cautionary tales, readers will learn how to utilize contracts to identify and avoid costly relationship landmines, reduce pet peeves, and create a joint mission statement, all the while ensuring that one's wealth and values are transmitted to future generations. Love and Money demystifies many legal structures, including: Prenuptial agreements Postnuptial agreements Cohabitation agreements Love contracts Wills Trusts Powers of attorney Healthcare advance directives After learning how to erect legal barriers against external wealth destroyers and evildoers, the focus of the book moves to internal wealth destroyers. Readers will learn how to identify and combat internal wealth repellants such as low self-esteem, fear, and stress. Becoming and remaining wealthy requires more than just money. This book provides a unique education about the interrelated nature of the internal and external laws of wealth and how to put them both to work for stronger relationships with one's finances and loved ones.

Diseases of the Inner Ear - Masoud Motasaddi Zarandy 2010-04-02 It is by your own eyes and your ears and your own mind and (I may add) your own heart that you must observe and love Sir William Osler It has been just over 20 years that Hawke and Jahn's seminal book entitled Diseases of the Ear: Clinical and Pathologic Aspects was published. The book was unique from other textbooks in otology at the time and concentrated its message according to two well-known proverbs in English literature namely "A picture is worth a th- sand
words” and “Seeing is believing.” Dr. Masoud Motasaddi Zarandy has taken these twin concepts, and in the process, has produced a very beautiful and a visually pleasing book. The pictures and accompanying text allows the reader not only to see how different pathologies affect the inner ear but also to appreciate the clinical consequences that arise from our decision-making processes. Far from dry, the inner ear and skull base comes to life when we see the dynamics of how disease involves this complex and integral part of the body. For the uninitiated, this book takes us on a tour of the field that has evolved over the past decade into the formal discipline of neurotology/skull base medicine and surgery. It has quite rightly become a specialized branch of otolaryngology/neurosurgery where interdisciplinary collaboration has become the rule rather than the exception. Advances in imaging (including intraoperative stereotaxis), technology (i.e. 

**Scarred**-Sarah Edmondson 2019-09-17 As seen in the HBO docuseries THE VOW: The shocking and subversive memoir of a 12-year-NXIVM-member-turned-whistleblower, and her inspiring true story of abuse, escape, and redemption. "'Master, would you brand me? It would be an honor.' From the second I climb onto the table, acutely aware that I am lying in the sweat of my sisters, I will have blocked that out. Lying there completely naked, I am at my most vulnerable but determined to prove my strength. I try to keep my legs closed as my body wills itself to protect my most private area... I tell myself: I am a warrior. I birthed a human. I can handle pain. But nothing could have ever prepared me for the feel of this fire on my skin." Scarred is Sarah Edmondson's compelling memoir of her recruitment into the NXIVM cult, the 12 years she spent within the organization (during which she enrolled over 2,000 members and entered DOS—NXIVM's "secret sisterhood"), her breaking point, and her harrowing fight to get out, to expose Keith Raniere and the leadership, to help others, and to heal. Complete with personal photographs, Scarred is also an eye-opening story about abuses of power, female trust and friendship, and how sometimes the search to be "better" can override everything else. • In the tradition of Unorthodox by Deborah Feldman, Escape by Carolyn Jessop, and Troublemaker by Leah Remini • This tell-all follows Sarah from the moment she takes her first NXIVM seminar, to the invitation she accepts from her best friend, Lauren Salzman, into DOS, to her journey toward become a key witness in the federal case against its founders • Evokes questions about friendship, ethics, good and evil, making it a brilliant selection for book clubs Audio edition read by the author.

**Otolaryngology Cases**-Myles L. Pensak 2017-10-20 In the tradition of the acclaimed first edition, experts from the University of Cincinnati’s Department of Otolaryngology-Head and Neck Surgery present new case reviews. Every chapter presents patient-based scenarios to prepare practitioners for ENT cases they will encounter during rounds, rotations, and patient exams. By establishing a uniform algorithm in obtaining and utilizing discreet points of data, the authors encourage a disciplined approach to patient assessment and management options. Sections organized by anatomy and subspecialty enhance the ability to learn and retain knowledge. For
example, benign and malignant pathologies are systematically detailed in anatomical sections dedicated to the neurovascular structures, oral cavity and pharynx, larynx, thyroid, salivary gland, and skin. The text covers the full age continuum - including congenital, acquired, benign, and malignant disorders such as pediatric subglottic stenosis and facial, head, and neck cancers that primarily affect adults. Key Highlights

Presentation of 100 practical cases including history, differential diagnoses, test interpretations, definitive diagnoses, medical and surgical management, rehabilitation, and follow-up. Up-to-date coverage of every major ENT specialty: otology and neurotology, the skull base, rhinology, laryngology, head and neck cancer, sleep disorders, pediatric otolaryngology, trauma, and facial plastic and reconstructive surgery. Nearly 150 meticulous color photographs and graphics elucidate disease characteristics and clinical findings.

Chapter bibliographies with current literature sources augment case reviews. Multiple-choice questions serve as a robust study tool, optimizing knowledge acquisition and retention. This must-have resource enables otolaryngology residents and practitioners to learn from case studies and incorporate state-of-the-art techniques into daily practice, thereby optimizing patient care.

Estimating Market Value and Establishing Market Rent at Small Airports - Aviation Management Consulting Group, Inc 2020

"Staff from smaller airports typically lack specialized expertise in the negotiation and development of airport property or the resources to hire consultants. ACRP Research Report 213 provides airport management, policymakers, and staff a resource for developing and leasing airport land and improvements, methodologies for determining market value and appropriate rents, and best practices for negotiating and re-evaluating current lease agreements. There are many factors that can go into the analysis, and this report reviews best practices in property development." -- Foreword.

Amy Levy - Naomi Hetherington 2010-04-06

Amy Levy has risen to prominence in recent years as one of the most innovative and perplexing writers of her generation. Embraced by feminist scholars for her radical experimentation with queer poetic voice and her witty journalistic pieces on female independence, she remains controversial for her representations of London Jewry that draw unmistakably on contemporary antisemitic discourse. Amy Levy: Critical Essays brings together scholars working in the fields of Victorian cultural history, women’s poetry and fiction, and the history of Anglo-Jewry. The essays trace the social, intellectual, and political contexts of Levy’s writing and its contemporary reception. Working from close analyses of Levy’s texts, the collection aims to rethink her engagement with Jewish identity, to consider her literary and political identifications, to assess her representations of modern consumer society and popular culture, and to place her life and work within late-Victorian cultural debate. This book is essential reading for undergraduate and postgraduate students offering both a comprehensive literature review of scholarship-to-date and a range of new critical perspectives. Contributors: Susan David Bernstein, University of Wisconsin-Madison Gail Cunningham, Kingston University Elizabeth F. Evans, Pennsylvania State University-DuBois Emma Francis, Warwick University Alex Goody, Oxford Brookes University T. D.
The Bulk Sales Act - Alberta Law Reform Institute 1990 This report describes the Act and states the reasons for our conclusion that the Act should be repealed. It also contains the text of the Act, describes the survey conducted of members of the legal profession regarding their views on the Act, and summarizes the most frequently expressed reasons for retaining the Act, and states why it was concluded that those reasons were overborne by those in favour of repeal. Finally, it describes some approaches that could be taken to reforming rather than repealing the Act.

Fabulous Faces - Peter Adamson 2010-11-22 With the help of true stories from transformed patients, Dr. Peter Adamson provides an intimate glimpse into the experience of plastic surgery. Is it right for you? How do you find a doctor? What surgeries and procedures are available? What can you expect before, during, and after surgery? The answers to all these and more are revealed in Fabulous Faces.

Apples Away! - Megan E. Bryant 2003 Crunching, chomping, munching, and chewing on the apples they brought for lunch, a group of school children counts down from five to one.

Hotel Gwales - Nigel Jenkins 2006 Hotel Gwales is the eagerly anticipated new collection from award winning poet Nigel Jenkins. It is as diverse as it is rousing, featuring some eighty poems varying in length from a three-line Haiku to an extended meditation of nearly 400 lines. Welsh themes and references, ancient and modern, are interspersed with works of an undeniably international flavour to bring together this exceptional collection. From a poem commemorating the execution of a man known as the Welsh 'Braveheart' to an elegy for a Welsh bus driver, Hotel Gwales truly has something for everyone. Hotel Gwales offers Nigel Jenkins's distinctive voice at its best in his first collection of poetry in almost four years. Nigel is well known both in Wales and internationally and is a frequent performer of his work. He has previously undertaken reading tours of countries including the USA and Switzerland. His trademark experimentation with form and ability to engage with his subject is at its finest.

Objectives, Obstacles, and Tactics in Practice - Valerie Clayman Pye 2019-11-27 "Objectives, Obstacles, and Tactics in Practice is the
first book that compiles practical approaches of the best practices from a range of practitioners on the subject of working with Stanislavski's 'objectives', 'obstacles' and 'tactics'. The book offers instructors and directors a variety of tools from leading acting teachers, who bring their own individual perspectives to the challenge of working with Stanislavski's principles for today's actors, in one volume. Each essay addresses its own theoretical and practical approach, and offers concrete instructions for implementing new explorations both in the classroom and in the rehearsal studio. An excellent resource for Acting and Directing instructors at the university level, Directing and Theatre Pedagogy students, high school/secondary theatre teachers, and community theatre leaders, Objectives, Obstacles, and Tactics in Practice serves as a resource for lesson planning and exploration, and provides an encyclopedia of the best practices in the field today.

Voltaireiana

**Transnasal Endoscopic Skull Base and Brain Surgery**- Aldo C. Stamm 2011-08-24

Tips and pearls on the latest developments on endoscopic approaches to skull base and brain surgery from experts around the globe! Ideal for both otolaryngologists and neurosurgeons, Transnasal Endoscopic Skull Base and Brain Surgery: Tips and Pearls gathers together in one comprehensive volume invaluable advice from world-renowned authorities on state-of-the-art endoscopic technologies and techniques. Each succinct chapter begins with a summary of key takeaway points and features an easily accessible outline format. After uniquely detailed coverage of macroscopic and endoscopic anatomy, the expert authors discuss the most up-to-date surgical approaches integrated with key information on technologic advances, such as 3D reconstruction and navigation. Clearly labeled illustrations demonstrate each step of the various procedures. The book closes with practical guidance on postoperative care and guidelines for avoiding and managing the potential complications encountered in these complex surgeries. Features:
- In-depth information on endoscopic surgical procedures for the paranasal sinuses, anterior skull base, and the cranio-cervical junction
- Easy-to-reference bullet-points in each chapter distill the renowned authors vast experience
- Step-by-step surgical descriptions cover the full spectrum of skull base pathology
- Stunningly detailed illustrations, including more than 500 in full-color, enhance the text throughout

This landmark work will improve the accuracy and precision of every surgeon and fellow in otolaryngology-head and neck surgery and neurosurgery who deals with this delicate anatomic region.

**Stand Firm**- Paul Gould 2018-11

In an age of skepticism and disenchantment, people long for something that satisfies our mind’s search for truth and our heart’s desire for beauty and meaning. Stand Firm: Apologetics and the Brilliance of the Gospel argues that the gospel
satisfies both of these needs. It is true and rational, but it is also inherently attractive and provides meaning and purpose. In short, the gospel is brilliant. It is brilliant, in one sense, because of the broad variety of evidences for its truth. But it is also brilliant given its beauty, goodness and the meaningful life it offers. The book provides up to date responses to questions about the existence of God, the reliability of the Bible, Jesus and the resurrection, and the problem of evil. It also treats unique topics such as understanding truth, knowledge and faith, the claims of alternate faiths, religious disagreement, etc. Each chapter attempts to connect these considerations with the gospel so that we may stand firm in our faith.

**Head and Neck Surgery**-Robert L. Ferris 2013 "This first volume of Master Techniques in Otolaryngologic Surgery focuses on the procedures used in Larynx, Hypopharynx, Oropharynx, Oral Cavity and Neck surgeries. The Master Techniques in Otolaryngologic Surgery Series provides "how-to" guides to both the common and advanced procedures performed in the major subspecialties of Otolaryngologic Surgery. Step-by-step instructions and over 300 full-color intraoperative photographs and line drawings makes this guide an excellent reference for Head and Neck specialists and General Otolaryngologists alike. FEATURES: Each procedure follows the series format and scope for clear step-by-step instruction to each technique Written by experts in the field from around the world Covers both common and advanced procedures Over 300 full-color photographs and drawings Companion website with full-text and supplemental video segments that showcase key techniques See Volume 2 (sold separately) for coverage of Thyroid, Parathyroid, Salivary Glands, Sinonasal Cancer, and Nasopharyngeal Cancer "--

**The Illustrator 7 Wow! Book**-Sharon Steuer 1998 An updated edition includes time-saving techniques and tips for users of Adobe Illustrator 7, exploring the software's basic tools and latest features with full-color examples and samples from leading Illustrator artists and designers. Original. (All Users).

**Afghanistan**-Paula Bronstein 2016-06-07 The Afghan people are standing at a crucial crossroads in history. Can their fragile democratic institutions survive the drawdown of US military support? Will Afghan women and girls be stripped of their modest gains in freedom and opportunity as the West loses interest in their plight? While the media have largely moved on from these stories, Paula Bronstein remains passionately committed to bearing witness to the lives of the Afghan people. In this powerful photo essay, she goes beyond war coverage to reveal the full complexity of daily life in what may be the world's most reported on yet least known country. Afghanistan: Between Hope and Fear presents a photographic portrait of this war-torn country's people across more than a decade. With empathy born of the challenges of being an American female photojournalist working in a conservative Islamic country, Bronstein gives voice to
those Afghans, particularly women and children, rendered silent during the violent Taliban regime. She documents everything from the grave trials facing the country—human rights abuses against women, poverty and the aftermath of war, and heroin addiction, among them—to the stirrings of new hope, including elections, girls’ education, and work and recreation. Fellow award-winning journalist Christina Lamb describes the gains that Afghan women have made since the overthrow of the Taliban, as well as the daunting obstacles they still face. An eloquent portrait of everyday life, Afghanistan: Between Hope and Fear is the most complete visual narrative history of the country currently in print.

The Coral Island - R. M. M. BALLANTYNE 2021-07-20 Three teenage boys, the sole survivors of a shipwreck, find themselves marooned on a deserted island in the South Pacific. With little more than a telescope and a broken knife, the youths must find food and shelter and learn to survive. But though the coral island is a tropical paradise, full of natural beauty and exotic fruits and wildlife, dangers and adventures abound: sharks, pirates, and even bloodthirsty cannibals! Scottish-born R.M. Ballantyne (1825-1894) wrote more than ninety books for young people during the Victorian era, the most famous of which is The Coral Island (1857), a tale whose popularity has proved so enduring that it has never been out of print. A thrilling story in the tradition of Robinson Crusoe and a key influence on later classics such as Robert Louis Stevenson's Treasure Island and William Golding's Lord of the Flies, The Coral Island is presented here in a new scholarly edition that includes the unabridged text of the first British edition, a new introduction and notes by Ralph Crane and Lisa Fletcher, and the original illustrations by the author.
