Not the Slitest Chance: The Defence of Hong Kong 1941

Not the Slitest Chance: Tony Banham 2023-03-01 The book represents the first attempt to join together all existing accounts of the December 1941 Battle of Hong Kong and the fighting between the Garrison and the invading Japanese. Banham makes use of the Garrison’s own files - only 14,000 survivors - to provide a historical account from the perspective of individuals, rather than by battalions. His story covers the fighting phase by phase, and considers the individual actions that made up the battle, the military strategies, and the many controversies that arose. Night Blitz - John Ray 2012-12-08 September 1940: defeated in the Battle of Britain, despite their superior numbers and better equipped aircraft, the Luftwaffe launched a new campaign of attack, their target this time the civilian population. For eight months, with hardly a night's break, Luftwaffe bombers pounded industrial cities and targets in a concerted attempt to smash Britain's war economy and destroy civilian morale. It was the first time a civilian population had been subject to mass attack, night after night, and important lessons were to be learned on both sides. If this campaign failed - as it did - then surely Britain could win the war if this family structure and community organizing study of the campaign, Howard T. Devall 1976 An analysis of the strategies, weapons and bombing tactics employed throughout the Night Blitz. His geographic recall of the effects of the Blitz on British cities, industry and people, month by month. This was the war at home, when terror fell indiscriminately from the skies. Yet despite all the death and destruction, the spirit of the British people remained unbroken even in their darkest hours.

Society of Terror - Paul Neurath 2015-12-22 During 1938 and 1939, Paul Neurath was a Jewish political prisoner in the concentration camps at Dachau and Buchenwald. He owed his survival to a temporary Nazi policy allowing release of prisoners who were willing to go into exile and the help of friends on the outside who helped him obtain a visa. He fled to Sweden before coming to the United States in 1941. In 1943, he completed The Society of Terror, based on his experiences in Dachau and Buchenwald. He emulated a long career teaching sociology and statistics at universities in the United States and later in Vienna until his death in September 2001. After liberation, the horrific images of the extermination camps abounded from Dachau, Buchenwald, and other places. Neurath's chillingly factual discussion of his experience as an inmate and his attempts to observe the conditions and the social structures in Dachau and Buchenwald captivate the reader, not only because of their authenticity, but also because of the world's proximity to the events and the absence of influence of later interpretations. His account is unique also because of the exceptional links Neurath establishes between personal experience and theoretical reflection, the genuine opposition between the distanced and outer view of the scientist and that of the prisoner.

Contesting Global Order - James H. Mittelman 2011-02-21 Contesting Global Order traces dominant values and patterns on a world level over the last half century. Including a framing introduction written for the volume, this book presents James H. Mittelman's most influential essays. It offers cross-regional analysis, drawing on his fieldwork in nine countries in Africa and Asia. This research-engages mechanisms by which prevailing knowledge about global order is implicated in its deep tensions. chiefly, the impetus for development and global governance embodies aspirations for attaining wellbeing and upholding human dignity; yet market- and state-driven globalization embraces vulnerability and making the world more insecure. Rather than exalt one element in this quandary over another, Mittelman offers cross-regional analysis, drawing on his fieldwork in nine countries in Africa and Asia. This research explores...
